## A Message from Director

On Valentine's Day, the daycare team enjoyed the surprise the children gave to all team members in the form of handmade cards. On behalf of the entire team, I'd like to thank all of the parents for taking time out of your busy schedules and putting in the effort. We hope you are as enthusiastic about March as we are. This month is jam-packed with activities for the kids.

## Mark your Calendars!

1. St. Patrick's Day celebration on March 17th!

(Wearing green will be appreciated and there will be activities for the children)

2. Medical Checkup Day –  
12th March.

3. Annual Function (March 25th) - will feature dance performances by children and the presentation of yearly awards. We recognize that our students and teachers are gifted, and we encourage everyone to share their abilities. Sponge painting class on 29th March – Each and every child will sponge paint their favorite cartoon.

(Everything will be provided by the daycare)

## Big thing planned for April -

Next month, we will launch our website, which will include all of the activities we use to teach children in our classrooms. Each parent will be assigned a login ID to view their child's performance and communicate with the teacher via the platform. The birthday child will be featured on the website's homepage, and the same will be done for the staff.

Please share your feedback or suggestions with us through email or social media handles

## Teacher-student Bonding

Our daycare will begin with an initiative to assist new children in forming bonds with teachers and feeling at ease in the daycare. The teacher will plan a day with each new child's parents to surprise the child with a visit to their home. This will help the child feel more at ease.

## Reminders and Updates

As was stated in the last email, we have scheduled a doctor to visit once a month and conduct a full physical exam. On the medical staff, there will also be a dentist and experts on lice. If you have any particular worries that the medical staff needs to be made aware of, do let us know. In order to prevent sending children home, parents are encouraged to check their children for lice.

## Lice Issue

Because we place the greatest importance on children's safety, we have designated a nurse who visits each class every morning and randomly checks for lice.

## Workshop for teachers -

Teachers will have access to a free online session on handling lice and other health issues. If any parents like to attend the session, kindly let us know before the following weekend so that we may make the necessary arrangements.
